

**Tetsuya Tanaka**

***Chief, Climate Change Section in Environment, Air Transport Bureau; International Civil Aviation Organization (ICAO)***

Mr. Tetsuya Tanaka is Chief, Climate Change Section in Environment, Air Transport Bureau of International Civil Aviation Organization (ICAO). He leads and manages work programs related to policy matters on international aviation and climate change, including the development of a global market-based measure for international aviation, development and deployment of sustainable alternative fuels for aviation, and provision of capacity building and other assistance to support Member States' action plans on aviation CO<sub>2</sub> emissions reduction activities. He also takes lead in activities related to ICAO's cooperation with other UN bodies, such as the UNFCCC process. Before joining the ICAO Secretariat in 2008, Tanaka worked for the Civil Aviation Authority of Japan and dealt with a variety of aviation issues, including the environment, airworthiness and bilateral air service agreements.
